To Whom It May Concern

I am familiar with Dr. Vassev for more than ten years. During that period he had work duties like all the other surgeons in the consulting room, outpatient operating room, emergency and elective operating theaters. He managed initial physical patient examinations, appointment of necessary laboratory and instrumental examinations and consultations with other specialists, medication, surgical treatment in conventional surgery, corresponding to his qualifications, assists in operations beyond his capabilities as an operator, the maintenance treatment of patients already underwent surgery. He coped really great with all of his duties.

For four years mini-invasive and laparoscopic surgery occupy an increasing share of all operations done by him. At present, he easily handles cholecystectomy, appendectomy, inguinal and abdominal wall hernia repair, biopsy of internal organs. Mastering the laparoscopic treatment of hiatal hernia and colorectal diseases are forthcoming. Overall, the work of Dr. Vassev is characterized by competence, desire, professionalism, striving to absorb the developments in our daily surgical and in medicine in general.

George is a highly intelligent, perceptive young man. He is always consistent, dedicated and passionate, enthusiastic, cheerful, and a pleasure to work with. He has incredible creative energy and a refreshing idealism tempered only enough to accomplish what needs to be done. Feel free to contact me anytime.

Sincerely Yours,

Prof. Vladimir Dimov, MD, PhD

Head of The Department of Mini-invasive and Laparoscopic Surgery
